About This Game

Do you want to know what it's like to be one of the top managers of the corporation engaged in construction of the vacuum tube train network? Hyper Train Corporation is a great chance to experience that kind of life!

You will have an opportunity to choose the region, where the first railways will be laid, and to prioritize further construction activity. Remember that the cost of the road construction depends on the distance between cities, while the profitability depends on the demand for this direction.

Enhance the comfort and wagon capacity, increase the reliability and speed of the train.

Estimate your opportunities: road maintenance involves daily expenses. In addition, you need to have money for the unscheduled repair of trains and railways in case of emergency. If the corporation goes bankrupt due to your fault, you will be in trouble. And you want to stay out of jail, don't you?

But let's look on the bright side. While engaged in the venture projects development, you need to believe in its future success. If you manage to conduct business in the proper way and build a profitable corporation, you will save enough money to implement the project that's unprecedented in its scope: build tunnels between the continents and launch the vacuum tube trains!

The game is incomplete, and was released the crudest way as possible. However it have a good premise, with an interesting engine wich allows it to grow and someday became a real game, today it is a shame to be sold full-price as a complete game, not as an alpha-test version.. The game is no fun. It's more like a hyper train repair simulator. That's what you do most of the time. They already received some feedback a few month ago, more than they deserve. Since the last update of this game they announced 2 more (simple minded?) games. I can't see any signs of life that the devs are still working on this game. Right now it looks abandoned.

DO NOT BUY THIS GAME. Be careful about the developer "Dreambakers" and don't trust them before they do anything good to this game to bring it on track.. This has got to be the worst game I have ever played. Here are several reasons:

1. Lack of Time controls. You build a train network. However, you are forced to spend time waiting for the train network to be built. You can't speed up the game and you can't slow down the game so if your first train network takes over 1000 days to build, you have to sit there for 1000 in game days which isn't fun. It's so boring that this game should be named a waiting simulator...
2. No strategy & Challenge. It's pretty much guarenteed that you'll make money. There are no competitors in the game, no in game events (except for your train tracks breaking down which are more of an annoyance).
3. There's no depth aka Choices in the game. You can only choose which city you want to connect to your network or what aspect you want to upgrade about your specific link in the network aka do you want City A <-> City B go faster, carry more or be more comfortable? Those collectively mean **FOUR CHOICES** at any given time for a player.
4. Their feeble attempt at challenge aka (accidents) is more an annoyance than a challenge. The game doesn't tell you how to prevent them either.
5. Lack of a tutorial. Well, I suppose the lack of challenge and strategy mean that you really don't need a tutorial but I'll include this. You need a tutorial for introducing new players to the game.. Nothing more than a clicker game. One click out of five.. Its fake game. Awfull. Dont buy it . Its waste of money.. This game is pretty hollow. There is not much gameplay to be found. A tutorial would be nice.

dont buy it, save your money on anything else
