About This Content

The heavy haulage turbo charged PRR Alco RS-11 road switcher is now available for Train Simulator.

Built between 1956 and 1964, the RS-11 was Alco's answer to the EMD GP9 and was fitted with a turbo charger and had a heavy pulling power of 1,800hp, making it an ideal heavy freighter but also saw some passenger service in its lifetime. In total, 425 units were built, primarily for the American and Mexican market, and some can still be found on US railroads today.

The Alco RS-11 for Train Simulator, developed by virtualRailroads, is available in Pennsylvania Railroad livery and features fully detailed and working cab, dynamic braking capability and independent wiper control.

The locomotive is also Quick Drive compatible, giving you the freedom to drive the Alco RS-11 on any Quick Drive enabled route for Train Simulator, such as those available through Steam. Also included are scenarios specifically for the [Horseshoe Curve](#) (available separately and required to play these scenarios).

Scenarios

Four scenarios for the Horseshoe Curve route:

- Evening Switcher

-
- Working in Altoona Yard
 - Work on the Branch
 - Cresson to Altoona

More scenarios are available on Steam Workshop online and in-game. Train Simulator's Steam Workshop scenarios are free and easy to download, adding many more hours of exciting gameplay. With scenarios being added daily, why don't you check it out now!

Key Features

- Alco RS-11 in Pennsylvania Railroad livery
- Quick Drive compatible
- Fully working and detailed cab interior
- Independent wiper control
- Dynamic locomotive braking
- Scenarios for the Horseshoe Curve route

Title: Train Simulator: PRR Alco RS11 Loco Add-On

Genre: Simulation

Developer:

virtualRailroads

Publisher:

Dovetail Games - Trains

Franchise:

Train Simulator

Release Date: 4 Apr, 2013

a09c17d780

Minimum:

OS:Windows® XP / Vista / 7 / 8

Processor:Processor: 2.8 GHz Core 2 Duo (3.2 GHz Core 2 Duo recommended), AMD Athlon MP (multiprocessor variant or comparable processors)

Memory:2 GB RAM

Graphics:512 MB with Pixel Shader 3.0 (AGP PCIe only)

DirectX®:9.0c

Hard Drive:6 GB HD space

Sound:Direct X 9.0c compatible

Other Requirements:Broadband Internet connection

Additional:Quicktime Player is required for playing the videos

English,German

This is a very nice locomotive and highly recommended.. A Very Smooth Locomotive Good Breaks Comes In Handy On Horse Shoe Curve Nice Bell Good Sounding Horn An Good Head Lights An A Very Cool Looking Locomotive For The PRR. This could use lots of work.

RS11's never had 539T's.

The sounds are wrong, its a 539T mixed with 567D3 sounds.

The horn is a RS5T despite the model being an RS3L.

The bell is a generic MSTs one, presumably from the Acela.

The sounds are low quality, it sounds like a 240p youtube video.

Overall rating: 2V10.. This is a FANTASTIC model with GREAT SOUNDS

The sounds fit this ole' classic perfectly, and they have simulated the classic ALCO smoke accurately.

A MUST HAVE for all American Railfans!!!!. If you like the PRR and you have Horseshoe Curve, you need this train. Pulls great, runs great, sounds great. Not crazy over the bell, but that's a personal preference I guess. The horn is my favorite in the game. This thing smokes more than Willie Nelson (if you catch my drift), just like the real alcos did. The RS11 was also used on the LIRR, so I'm hoping they make a route out here so they can make a reskin of this in LIRR blue and orange
