[Wic Reset Utility Crack Keygen Patch](#)

The screenshot displays the WicReset v.3.90.10 software interface. The main window shows a printer model 'Epson L120' and several control tabs: 'Control', 'Error codes explanation', 'Supported models', 'News', and 'FAQ'. Under the 'Control' tab, there are sections for 'Waste counters', 'Information', and 'Cleaning'. The 'Waste counters' section is highlighted with a red box and contains 'Read waste counters' and 'Reset waste counters' buttons. The 'Information' section has 'Status' and 'Report' buttons. The 'Cleaning' section has a 'Head cleaning' button. A 'Refresh detected printers list' button is located at the bottom left. A status window titled 'WicReset' is open in the foreground, displaying a table of counter statuses:

Counter	Status
Counter	100.35% This counter has reached maximum and will need reset before the printer can be used again.
Counter	66.98% This counter is ok.
Counter	3.80% This counter is ok.

Below the status window, there is a section for 'EEPROM' and a 'Close' button. At the bottom of the main window, there is a list of troubleshooting steps:

If you experience communication errors or do not see your printer, please, try the following:

1. Shutdown the printer and restart your computer.
2. Make sure that your USB cable is of the good quality and try to use another USB port.
3. Disable printer status monitor via printing preferences or task manager.
4. Cancel all printer jobs and disable any applications that can communicate with the printer.
5. Start the printer, wait until initialization sequence is finished, then repeat desired operation.

Please, remember, that fatal error isn't related with waste overflow and it could not be reset by software.

The 'ResetKey.net' logo is visible in the bottom right corner.
